Since some "mismatch" games are not used in determining the rankings, the Sched column can be somewhat misleading as it reflects the average opponent strength of only the opponents ranked within 4 goals of each team.

It should also be noted that the ratings are an attempt to assess the on-ice game strength of each team, therefore games that are decided via shootout will be treated as ties and games decided via forfeit will not be used.

These rankings will be updated weekly throughout the season.

Teams listed W-L-T record reflects only scores listed on the [Michigan HS Scores](#) page on the date the rankings were published.

Anyone can report missing Michigan scores using the easy [Michigan web form](#) or the [Michigan spreadsheet](#).

Please verify on the [Michigan scores](#) page that a score is indeed missing before reporting it.

Notes: * indicates teams with only two games against teams ranked within 4 goals of them.
- indicates teams with only one game against teams ranked within 4 goals of them.

The rankings are only as accurate and complete as the scores that they are derived from.
